

### Part C: Poster Time!

Have a read of this person's opinion down below. Can you design a poster to challenge this person's belief? How could you persuade them that climate change is caused by humans, AND encourage them to learn more about climate change?

*"I don't believe in this climate change thing. I don't see anything major changing around me. Sure the weather has always been unpredictable in this country! Maybe it's just bad weather"*

Make sure that your poster has all the following:

- Make it eye catching! Don't use too much text
- Use persuasive language
- Use pictures to illustrate your points
- Use facts and evidence to back up your points
