

SPHE - Climate Change (2)

Part A: Where do you stand on these climate change ideas? Write down whether you agree or disagree with each statement below:

1. Business should pay more money the more pollution they cause.

2. If a business accidentally damages the environment (say they spill some chemicals or oil by accident) they should have to pay a lot of money as punishment.

3. Nobody should tell businesses what they should be doing for the environment. They are free to do whatever they want.

4. People who work for a company should be forced to reduce their waste and save electricity.

5. All businesses would be more successful if they did more to try and protect the environment.
