

Bar Graphs Lesson 2

It's time to test your bar graph knowledge! I hope you remember the steps to drawing a bar graph. Read the description to help you fill in the data table.

Then draw the graph!

I was walking to school and counting the colours of the cars I saw on the way. I saw 35 cars altogether! There were 15 black cars. That was more than any other colour. There were 8 blue cars and the same amount of red cars. All the rest of the cars were green!

Colour of Car	Tally	Total
