

# What is Weight? Activities

Investigation Time! Head to the kitchen. Collect 5 different packages that have their weigh printed on them. When you have them, complete the challenges below!

Sort your packages in order from lightest to heaviest. Draw the packages in order below:

How much does the lightest package weigh?

Sort the items into weighed by G and weighed by KG

G

KG

How much does the heaviest package weigh?

How much heavier is the heaviest item than the lightest item?

Write a word problem about the items you collected:
